Subject: RE: (Investigations/Other - FY18-165061-3800-CV) Referred to Region - Delaware

Hi Nan

I'm awaiting a new password for RAV.

When I get into RAV I can email her to state that EPA (Amy Cohen) recently addressed the drinking water questions through FOIA and phone conversations, and when we have any updates as to any further actions by EPA and or DNREC we will update her. I can put email summary in RAV?

Jim is off today. And I'm off tomorrow. I'll get with him on Monday.
We are kinda sure DNREC is still getting their game plan together which is why they haven't told us what it is yet.

Is there a timeframe for when we have to reply to this complaint?
Does it need to be in writing?
Does it need to be official or can I just call her and re-re-explain the situation (as it pertains to us) to her.

To all:

Kate is out of the office for the next two weeks. Should this issue be forwarded to anyone else – Rick, Dom, Cosmo? Or you think it can wait until Kate is back in the office?

Amy:

I just talked with Mike G. so I understood what was happening.
Mike was only responding to this RAV for the CW NPDES part of this issue – he spoke with DNREC and forwarded the RAV to the state.
The RAV still needs a DW response

I guess you could forward the DW side of the complaint to DE, but **my suggestion would be to draft a desk statement** (not for press, but for the public) stating EPA's position – just in case there are more complaints coming in. It might say that there is nothing EPA can do at this time due to actions taken by the state, but it would help if it was in writing and all callers/complaints received the same response.

Yes, sending the complaint to the state is a valid response (per Shawn Garvin) however I think that we need to have a desk statement ready for any future complaints and to ask if they are responding to her (I know we don't have the authority to "make" them respond, but.....).

Jim has access to RAV: I can't remember who else in your office has a password (Jeremy or Kevin?).
Updating RAV is totally separate to responding to the requestor.

Nan, do we have to respond to Personal Matters / Ex. 6 directly in reference to this? And how will I know if it is me?
Mike Greenwald said last week he'd forward it to the state.
Who updates RAV? and if its me, are there instructions that you can point me towards.

thanks

Andy, Mike:

Please read the submitted RAV complaint and Amy Cohen's message to me.

Amy will contact you early next week about this RAV complaint.

As I understand, Andy, you are familiar with this issue.

Amy just completed a FOIA from [Personal Matters / Ex. 6] requesting all records related to the issue and those records should be available to her in FOIAOnline by the end of this week.

Due to the DNREC NOV, [Personal Matters / Ex. 6] is not getting the specific information she wants (or the answers she wants), but possibly the issue can be looked at through clean water and something more can be done.

Mike: If you are working tomorrow, Amy will be working at home if you want to call and get some background.

Nan

Subject: RE: (Investigations/Other - FY18-165061-3800-CV) Referred to Region - Delaware

All; Most of [Personal Matters / Ex. 6] complaints below have to do with the recent violations of the spray irrigation permit and DNREC NOV.

We are already responding to a FOIA from her regarding the 7 affected homes that were supplied alternate drinking water in our 2003 Order.

She has addressed the concerns she mentioned below to me on several occasions and I told her that issues with the spray irrigation are a DNREC issue since they issued the permit.

I touched base with Andy Dinsmore as a heads up a couple of weeks ago.

Andy Duchovnay is the new attorney assigned to the case. We have had meetings with Rick Rogers and Cate McManus and the RA has also been unofficially briefed by Cate on the drinking water portion of the issue as it pertains to our 2003 Order.

I can give anyone an update as needed.

But I think someone else needs to contact [Personal Matters / Ex. 6] other than me, because like I stated, we have had several conversations and she is not satisfied with the limited scope of my responses, otherwise she would not keep pursuing the issue.

I'm in the office til 5 today and working AWL tomorrow, off on Friday, back in at 7am on the 2nd.

SUBJECT: Referred to Region - Delaware

FROM: Personal Matters / Ex. 6

TO:

Name: Personal Matters / Ex. 6

Address: Personal Matters / Ex. 6

City: Personal Matters / Ex. 6

State: Delaware

Zip: Personal Matters / Ex. 6

Phone: Personal Matters / Ex. 6

Alleged Violator's Name: Mountaire

Alleged Violator's Address: 29005 John J Williams Hwy

Alleged Violator's City: Millsboro

Alleged Violator's State: Delaware

Alleged Violator's Zip: 19966

Tip or Complaint: I have documents, videos , pictures etc . How can I get these to you? Personal Matters / Ex. 6 recent water sample. The nitrates are 25 and the water does not meet water quality standards for nitrates and coliform. Mountaire put a water treatment system in her home as part of the consent order from 2003. Obviously, there are problems here and public health concerns. I sent some still shots and video to DNREC, as I had great concerns about violations from operating the sprayfields in conditions that were causing runoff and windy conditions. I asked DNREC if these were violations of their permit. I also submitted still shots and video of solids coming out of the end of the sprayers, which the neighbors said gagged them and was being sprayed very close and blowing onto their property. I have the 20-page NOV and am requesting that this be investigated. They were not given permission , nor does their permit allow solids to be sprayed from the end of the sprayers. There was also sampling done at the wrong sampling locations and diversion of pipes from the pond to the pivots. I am wondering per Delaware code if may be criminal, beyond permit overages and the EPA's thoughts on this. This is an EJ community and now there are numerous wells contaminated and serious health concerns - from miscarriages to seizures, birth defects, asthma, COPD -among many others. A 24

yr old died on Herbert Lane. The contamination has spread way beyond Herbert Lane now.
